Li Xin is currently an associate professor at the School of Economics at Qingdao University and a specially-appointed professor at the fourth level. He is from Heze, Shandong Province. Li Xin obtained his Ph.D. in Applied Economics from Shanghai Jiao Tong University. As the first or corresponding author, he has published over ten academic papers in SSCI/SCI journals such as Energy Economics, Pacific-Basin Finance Journal, International Review of Economics & Finance, and Empirical Economics. He has participated in several national research projects, including the National Natural Science Foundation, the Key Project of the National Social Science Foundation, and the General Project of the National Social Science Foundation. He is enthusiastic about developing cutting-edge time series analysis methods such as Quantile ARDL, Cross-spectral Quantile Coherency, and

Convergency Cross Mapping.
